

Denodo Architect

Description

As a Denodo Architect, you will play a crucial role in designing and implementing Denodo-based solutions that meet our clients' data virtualization needs. You will be responsible for ensuring the technical feasibility and success of Denodo deployments, including architecture design, development, optimization, and support.

Responsibilities

- Design and implement effective Denodo data virtualization solutions that align with client requirements and business goals.
- Lead the architecture and development of Denodo environments, ensuring high performance, scalability, and security.
- Conduct technical workshops, training sessions, and presentations for clients and internal teams.
- Collaborate with project managers, data engineers, and other stakeholders to ensure successful project delivery.
- Perform data modeling, metadata management, and optimization of Denodo views and data sources.
- Troubleshoot and resolve complex technical issues related to Denodo implementations.
- Stay updated with the latest Denodo features and best practices, and advocate for their adoption where appropriate.

Qualifications

- Bachelor's or Master's degree in Computer Science, Information Technology, or a related field.
- Minimum of 2 years of experience in data architecture, with at least 2 years specializing in Denodo technologies.
- Strong understanding of data integration, ETL, and data warehousing concepts.
- Proficient in SQL and experience with relational and non-relational databases.
- Excellent problem-solving skills and the ability to think strategically about technical challenges.
- Strong communication and interpersonal skills, with the ability to work effectively in a team environment and interact with clients.
- Denodo certification is highly desirable.

Job Benefits

- Competitive salary and benefits package.
- Flexible working arrangements to support work-life balance.
- Opportunities for professional development and career advancement.
- A collaborative and inclusive work culture that values diversity and innovation.
